

J. Talbot Sellers, DO

Tal Sellers, DO is a board-certified physiatrist who is committed to helping his patients minimize their pain to maximize their enjoyment of life. As a physiatrist, he works with his patients to accurately diagnose and effectively treat their pain, with special consideration for more conservative treatment measures such as physical therapy, medication, and steroid injections to soothe irritated nerves. Dr. Sellers specializes in osteopathic medicine, which further emphasizes conservative approaches to medicine, and treating the patient as a whole instead of focusing on simply fixing symptoms.

Dr. Sellers graduated from the University of North Carolina at Chapel Hill with a bachelor's degree in Economics, before attending the Nova-Southeastern University College of Osteopathic Medicine. He then attended the University of Wisconsin Hospitals and Clinics in Madison, Wisconsin, where he completed a General Internal Medicine Internship, and his residency in Physical Medicine and Rehabilitation, and was also named Chief Resident.

After completing his formal education, Dr. Sellers began to practice at the NeuroSpine Center of Wisconsin. He works to optimize the well-being of each patient by working with his patients to choose the treatment options that are best for them. Dr. Sellers focuses on treating the patient as a whole to help promote a full and healthy life.

Dr. Sellers now practices at the NeuroSpine Center of Wisconsin, a multispecialty private group practice providing comprehensive world-class integrated care to individuals suffering from spine injuries, brain injuries, tumors, and acute or chronic pain. In addition to physiatrists, the clinic houses surgeons and physical therapists. The providers at the NeuroSpine Center of Wisconsin work closely as a team to give each patient exceptional individualized care with the least risk and inconvenience at every step along the road to recovery.
