

Jared S. Greenberg, MD

Jared S. Greenberg, MD is a board-certified, fellowship-trained physiatrist specializing in Regenerative medicine, Spine medicine, and non-surgical Orthopedics. As a physiatrist, he works with his patients to accurately diagnose and effectively treat the source of their pain. This is often accomplished with conservative treatment measures such as physical therapy and injection therapy (using fluoroscopic X-ray or ultrasound guidance for added precision) to improve mechanics, stimulate healing of the tissues and decrease chronic inflammation. Dr. Greenberg listens closely to each patient and empowers them to become active participants in their care for the best possible treatment outcome. He is the only physiatrist in the group who performs facet rhizotomies and orthobiologic procedures such as Lipogems, A2M, and platelet rich plasma (PRP).

Dr. Greenberg attended the University of Pennsylvania in Philadelphia for medical school. After medical school, he began an Orthopedic Surgery residency at the University of Wisconsin in Madison. During his surgical training, Dr. Greenberg realized that he was more interested in non-operative treatments of musculoskeletal conditions and returned to UPenn to complete a residency in Physical Medicine and Rehabilitation where he served as Chief Resident. Dr. Greenberg then pursued additional subspecialty training as an Interventional Spine Fellow/Clinical Lecturer in the PM&R Spine Program at the University of Michigan Health System in Ann Arbor.

Dr. Greenberg has been recognized as a leader in his field. He spent his first ten years in practice building a successful spine program at Meriter Hospital in Madison, and was voted as one of "Madison's Top Docs." In addition to the communities he serves, Dr. Greenberg has also treated professional, college, and Olympic athletes. Furthermore, he was selected to serve as a board examiner by the American Board of Physical Medicine and Rehabilitation.

Dr. Greenberg now practices at the NeuroSpine Center of Wisconsin, a multispecialty private group practice providing comprehensive world-class integrated care to individuals suffering from spine injuries, brain injuries, tumors, and acute or chronic pain. In addition to physiatrists, the clinic houses surgeons and physical therapists. The providers at the NeuroSpine Center of Wisconsin work closely as a team to give each patient exceptional individualized care with the least risk and inconvenience at every step along the road to recovery.
